Fish and Rice

DESCRIPTION

The formula was created based on the latest trends in modern nutrition and meets all the nutritional needs of dogs. This formula contains easily digestible proteins from high-quality types of meat (fish, poultry) and the optimal fat content provides a lot of energy and vitality. The specially designed vitamin/mineral complex provides good digestion, and enhanced immunity, nourishes the musculoskeletal system, and works to prevent joint problems in older dogs, as well as having a positive effect on the growth and development of all breeds from birth to adulthood. The recipe contains at least 85% protein of animal origin.

Adtiatic Junior Perfect Start

DESCRIPTION

The formula was created based on the latest trends in modern nutrition and meets all the nutritional needs of dogs. This formula contains easily digestible proteins from high-quality types of meat (fish, poultry) and the optimal fat content provides a lot of energy and vitality. Essential amino acids (lysine and methionine), together with a well-balanced complex of macroelements and microelements, have a positive effect on the growth and development of the puppy from birth to adulthood.

A specially designed vitamin/mineral complex ensures good digestion and enhanced immunity. The high-fat content provides him with enough energy. The recipe contains at least 85% protein of animal origin.

Active High Energy

DESCRIPTION

Premium food especially nutritionally balanced and specially created for high-quality working dogs, dogs that need to have a good appearance and finely formed muscle mass, and all types of kennels. Through top-quality raw materials, this food is intended for dogs with possible food intolerances. The protein content of 85%, which comes from meat and meat products, and the addition of fresh meat of 30%, builds lean musculature. Vitamins and minerals help with the functioning of the body, good vision, strengthening of the immune system, health of bones and teeth, and ensuring healthy digestion. A specially designed herbal mix with a variety of vitamins, minerals, essential oils, flavonoids, and tannins is a very valuable addition to dog food. Herbal Mix is full of healthy nutrients that can have a beneficial effect on the immune system, digestion, metabolism, and general health, and as such is an ideal supplement for dogs of all ages. High-quality and diverse fats achieve skin health and fur shine.

Puppy Mini Breed

DESCRIPTION

The formula was created for small and medium breeds that grow up earlier than large breed puppies. In this formula, care was taken to ensure a higher content of proteins, fats as well as vitamins and minerals. This ensured that this recipe contains enough nutrients and energy for faster growth. It also helps develop the immune and digestive systems and keeps your puppy in excellent condition.

Soy is rich in protein and is an excellent source of "good" fats. It is also rich in essential amino acids. Soy protein is one of the best vegetable proteins because in combination with those from cereals (rice and wheat) have the same nutritional value as protein from meat.

A whole cereal grain consists of three parts: husks, endosperm, and germ. The parts differ in their chemical composition, so the shell is like rich in dietary fiber, sprouts abound in vitamins, minerals, and fats, while endosperm enriched with the chemical composition of starch. Whole grains are a source of vitamins B1, B2, folate, and the minerals iron, magnesium, copper, and selenium, and they also contribute to the intake of dietary fiber.

Red meat contains vitamins, minerals, and antioxidants. Beef is rich in keratin and fiber, oleic, and palmitic acid. Chicken breast proteins have an extremely good ratio of essential and non-essential amino acid. This type of meat is an excellent source of protein.
